a challenge

## How can the Walk4Life website help me and my pupils?

- **Foster** students' understanding and ability to use Ordnance Survey maps
- **Search** for walks by postcode or place name
- **Develop** map skills, ICT skills and hand-eye coordination
- **Plot** a local mile starting from the school gates and **test** the fitness of yourself, your colleagues, your pupils and their friends and family
- **Watch** students' pride grow as they enter their completed miles and see their walking totals mount up
- **Build** co-operation and team spirit by signing up your class as a group
- **Challenge** yourselves to achieve more - with some healthy competition.

### Calling all teachers!

Want to **inspire** your students to walk further and more often?

Want to have **fun** working together and competing with other classes or other schools?

**Sign up** as a group now!

For more information go to [www.walk4schools.info](http://www.walk4schools.info)

"It was very easy to find my house and drawing the line of my walk was really fun."

#### group comments

Me and my mum took our dog for a walk at the weekend and added 2.3 miles to our total!
